

# Hanon McShea

[mcshea@stanford.edu](mailto:mcshea@stanford.edu), <https://cyclase.github.io>

## Education:

---

<b>Stanford University</b> , Stanford, CA	2018 –
Ph.D. in Earth System Science, <b>GPA:</b> 3.98/4.00	
<b>Harvard University</b> , Cambridge, MA	2014 – 2018
A.B. <i>magna cum laude</i> in Integrative Biology, secondary in Microbial Sciences, <b>GPA:</b> 3.86/4.00	

## Awards:

---

<b>Stanford Bio-X Travel Award</b>	2024
<b>Stanford School of Sustainability McGee and Levorsen Graduate Research Grant</b>	2021, 2023
<b>Training Program in Biophysical and Structural Analysis of Biological Macromolecules</b>	2023 –
<b>National Science Foundation Graduate Research Fellowship</b>	2018 – 2023
<b>Stanford Enhancing Diversity in Graduate Education Fellowship</b>	2018 – 2020
<b>Harvard Origins of Life Initiative Undergraduate Research Fellowship</b>	2017
<b>Harvard Life Sciences Conference Presentation Grant</b>	2017
<b>Weissmann International Research Fellowship</b>	2016
<b>University of Pittsburgh Training and Experimentation in Computational Biology Fellowship</b>	2015

## Publications in preparation:

- 
1. **McShea, H.**, Viens, R., Olagunju, B., Giner, J., and Welander, P. Evolutionary and biochemical analysis of triterpenoid cyclases. [Experiments complete, manuscript drafted, collaborators revising]
  2. **McShea, H.**, de Anda, V., Brocks, J., Baker, B., and Welander, P. A diterpenoid cyclase from the Asgard archaea. [Experiments complete, drafting manuscript]
  3. **McShea, H.**, Bhattacharya, A., Boxer, S., and Welander, P. Effect of sterol methylation on membrane biophysics. [Experiments in progress]

## Presentations:

---

<b>Northern California Geobiology Conference</b> (Talk, Stanford, CA)	2024
<b>Geobiology Gordon Research Conference and Seminar</b> (Poster, Ventura, CA)	2024
<b>Bay Area Population Genetics Conference</b> (Talk, Stanford, CA)	2023

<b>Society for Molecular Biology and Evolution</b> (Poster, Ferrara, Italy)	2023
<b>Northern California Geobiology Conference</b> (Poster, Stanford, CA)	2023
<b>Geobiology Gordon Research Conference and Seminar</b> (Poster, Ventura, CA)	2022
<b>Stanford Advanced Seminar in Microbial Molecular Biology</b> (Talk, Stanford, CA)	2022
<b>American Society for Microbiology Microbe</b> (Poster, Virtual)	2020
<b>Stanford Biochemistry Annual Research Conference</b> (Breakout talk, Santa Cruz, CA)	2019
<b>Northeast Geobiology Conference</b> (Poster, Woods Hole, MA)	2018
<b>Harvard Microbial Sciences Initiative</b> (Chalk talk, Cambridge, MA)	2018
<b>Harvard Origins of Life Initiative</b> (Chalk talk, Cambridge, MA)	2017
<b>Earth Life Science Institute (ELSI) Origins Network Universal Biology workshop</b> , (Talk, Tokyo, Japan)	2017
<b>Geobiology Conference</b> (Poster, Banff, Canada)	2017

## Research Projects:

---

### **Biophysical implications of sterol demethylation** Sept. 2023 –

*Welanders and Boxer Labs*, Stanford University Departments of Earth System Science and Chemistry

Physical properties of membranes are sensitive to small differences in sterol molecular structure, such as exocyclic alkyl group length, position, and stereochemistry. To systematically approach these effects on membrane condensation, fluidity, and phase, we are investigating a series of four sterols that each differ by one methyl group.

### **Evolutionary history of terpenoid cyclases** Sept. 2018 –

*Welanders Lab*, Stanford University Department of Earth System Science

Terpenoid cyclases perform an exquisitely controlled cyclization cascade to synthesize diverse products including sterols. My work involves experimental characterization of divergent cyclases of unknown function, as well as theoretical investigation of the evolutionary forces that produced such diversity.

- Heterologous expression in *E. coli*, especially of proteins from environmental metagenomes and uncultured organisms (metagenome-assembled genomes, including Asgard archaea)
- Molecular cloning to engineer *E. coli* strains to produce new substrates for *in hetero* cyclase activity
- Lipid extraction, purification, and analysis by gas- and liquid-chromatography mass-spectrometry
- Protein purification and *in vitro* biochemistry to determine cyclase substrates and products
- Phylogeny estimation under a variety of evolutionary models, statistical hypothesis testing
- Development of new methods for phylogeny estimation and analysis

### **Evolutionary trends in proteome composition** May 2020 – June 2023

*Masel Lab*, University of Arizona Department of Ecology and Evolutionary Biology

Nearly neutral theory predicts evolutionarily significant variation among species in the ability of selection to purge weakly deleterious mutations. This work investigated whether and how this variation in the effectiveness of selection affects the direction of protein evolution. We found strong preferences for some amino acids under more effective selection, specifically those with fewer rotational degrees of freedom, suggesting selection for greater  $\Delta G$  of folding.

### **Detecting adaptive events in the evolutionary history of nitrogenase using ancestral protein reconstruction** Dec. 2016 – Mar. 2018

*Kaçar and Edwards Labs*, Harvard University Department of Organismic and Evolutionary Biology

Global nitrogen fixation is performed by the enzyme nitrogenase. I used ancestral protein reconstruction to determine how the enzyme adapted to Earth surface redox change. I found that mutations arising in the stem lineages of aerobic nitrogenase clades are clustered in protein domains implicated in protecting nitrogenase from oxygen in their respective taxa – suggesting perhaps global selective pressure, such as Precambrian oxygenation.

### **Desmosome-mediated uterine remodeling for noninvasive implantation in the marsupial *Trichosurus vulpecula*** June – Aug. 2016

*Thompson Lab*, University of Sydney Department of Zoology

Placentation in mammalian pregnancy is a site of parent-offspring conflict, and as such has evolved diverse physiologies across marsupials and eutherian mammals. Within marsupials, it is yet unclear how non-invasive placentation evolved from an invasive ancestor. We studied changes in the uterine epithelial distribution of cell-cell adhesion protein desmoglein-2 over the course of non-invasive pregnancy in the brushtail possum *Trichosurus vulpecula* and found that their patterns did not differ from either eutherian or marsupial invasive placentation.

### **Agent-based modeling of the relationship between oscillatory calling and spatial cluster formation in an Anuran mating chorus** June – Aug. 2015

*Ermentrout Lab*, University of Pittsburgh Department of Mathematics

## Mentorship and Outreach:

---

<b>Undergraduate Research Mentor</b> (Stanford University)	2024 –
<ul style="list-style-type: none"><li>• Mentored computer science student Minh Tu in lab techniques and experimental design</li></ul>	
<b>Enhancing Diversity in Graduate Education Mentor</b> (Stanford University)	2023 –
<ul style="list-style-type: none"><li>• Mentored three Ph.D. students through their first year of graduate research</li><li>• Organized group lunches with EDGE mentees, mentors, and faculty mentor</li></ul>	
<b>Earth System Science Department Mentor</b> (Stanford University)	2020 – 2021
<ul style="list-style-type: none"><li>• Mentored two Ph.D. students through the first year of graduate research, in the midst of pandemic</li></ul>	
<b>Sustainability and Earth Summer Undergraduate Research Mentor</b> (Stanford University)	2019 – 2020
<ul style="list-style-type: none"><li>• Mentored biology student Robb Viens in heterologous expression of squalene-hopene cyclases, hopanoid extraction and analysis, and experimental design for a summer project and ongoing work in the Welander lab</li><li>• Helped the student successfully apply for a job in the biotechnology industry</li><li>• Co-authored a paper with the student (in prep)</li></ul>	
<b>Graduate Research Mentor</b> (Stanford University)	2018 –
<ul style="list-style-type: none"><li>• Brought new computational knowledge to the Welander lab (molecular structure visualization, phylogeny estimation, navigating HPC systems), trained lab mates interested in using these tools and helped troubleshoot</li></ul>	

## Teaching:

---

<b>Teaching Assistant, Research Proposal Development and Delivery</b> (Profs. Paula Welander and Page Chamberlain, Stanford University)	2023
<ul style="list-style-type: none"><li>• Met with students and provided detailed feedback on assignments and final proposals</li><li>• Organized grading system</li><li>• <i>What aspects of this instructor's teaching were most helpful to you?</i> "Caring, good feedback, honest," "Humor, candor, patience and thoughtful, detailed feedback," "Friendliness, availability, and willingness to clarify doubts," "Direct comments, positive, and intentional," "Clear communication, great feedback, approachable and offered helpful perspectives."</li></ul>	
<b>Teaching Assistant, Coevolution of Earth and Life</b> (Prof. Andrew Leslie, Stanford University)	2022
<ul style="list-style-type: none"><li>• Held weekly office hours and met with students to study</li><li>• Edited and graded course materials and exam problems</li><li>• <i>What aspects of this instructor's teaching were most helpful to you?</i> "Kindness and engagement," "Willingness to find answers even when they didn't originally have an answer, friendliness, direct explanations," "Kindness, understanding, compassion."</li></ul>	
<b>Workshop, Phylogenetic Theory and Analysis</b> (Stanford University)	2019
<ul style="list-style-type: none"><li>• Designed and led workshop on estimating phylogeny</li><li>• Materials available at <a href="https://github.com/cyclase/skillshare">https://github.com/cyclase/skillshare</a></li></ul>	
<b>Pamphlet, Critical pedagogy for graduate student teachers in STEM</b> (Stanford University)	2019
<ul style="list-style-type: none"><li>• Created a short teaching guide for the Diversity and Inclusion in the Geosciences seminar</li><li>• Available at <a href="https://bit.ly/2HuSmLr">bit.ly/2HuSmLr</a></li></ul>	
<b>Teaching Assistant, Geobiology and the History of Life</b> (Prof. Andrew Knoll, Harvard University)	2018
<ul style="list-style-type: none"><li>• Assisted Teaching Fellow Anna Waldeck in the preparation and leading of weekly lab sections</li></ul>	

## Service:

---

<b>Convener, Symposium on Causation in Protein Evolution</b> (Ferrara, Italy)	2022 – 2023
<ul style="list-style-type: none"><li>• Organized symposium at Society for Molecular Biology &amp; Evolution Meeting</li><li>• Recruited co-convener, invited keynote speakers, solicited and selected abstracts</li><li>• Organized dinner for invited speakers and networking session for attendees</li></ul>	
<b>Session co-chair, Northern California Geobiology Meeting</b> (Stanford, CA)	2023
<b>Co-chair, Student-invited Seminar Committee</b> (Stanford Earth System Science Department)	2021 – 2022
<b>Member, Diversity, Equity, and Inclusion Working Group</b> (Stanford School of Earth)	2020 – 2021
<b>Member, Gender Inclusive Housing Committee</b> (Stanford University)	2019 – 2020
<b>Treasurer, Scientists Speak Up</b> (Stanford University)	2019 – 2020

## Graduate-Level Coursework:

---

**Stanford:** Fundamentals of geobiology, Diversity and inclusion in the geosciences, Topics in geobiology, Geomicrobiology, Environmental microbiology I, Modern statistics for modern biology, Microbial genomics, Understanding Kinetics for Biologists and Biology

**Harvard:** Geobiology and the history of life, Low temperature geochemistry I & II, Analytic and field methods in geobiology, Oxygen and life, Stable isotope fractionation in multiple isotope systems, Genetics, Ecology, Herpetology, Vertebrate viviparity, Biochemistry of membranes, Microbial sciences: chemistry, ecology, and evolution, Molecular ecology and evolution, Systematics, Phylogenetics and phylogeography in the era of genomics

**Else:** **Workshop on Molecular Evolution**, Marine Biological Laboratory, Woods Hole, MA, 2022  
**Rapidata 2024: Practical Course in Macromolecular X-ray Diffraction Measurement**, Stanford Synchrotron Radiation Light Source, SLAC National Accelerator Laboratory, Menlo Park, CA, 2024
